

Primax Group Chemical Management Policies

Chemical Management Policies

Primax Electronics Co., Ltd. (hereinafter referred to as "the Company") is committed to sustainable corporate development. The formulation of chemical management policies ensures the safety, legality, environmental friendliness, and traceability of chemicals used in the assembly process of information products, thereby reducing impacts on employee health, product quality, and the environment, and fulfilling our responsibility for sustainable business operations.

Scope of Application:

This policy applies to the Company and its global subsidiaries in which it holds more than 50% ownership and has operational control, as well as to suppliers, service providers, contractors, and other key partners in the business value chain. The scope includes product research and development, procurement, production operations, distribution and transportation, and waste management. The Company follows this policy to fulfill its management responsibilities and to advance environmental sustainability.

Primax Group's Chemical Management Principles

1. Compliance and Standards Adherence in Chemical Management

Strictly comply with global chemical management regulations, establish a compliant and efficient chemical safety management system, control chemical procurement and operational standards, and ensure the health and safety of employees.

2. Active Prevention of Chemical Pollution

Go beyond regulatory standards, invest proactively, and prevent any environmental impacts resulting from chemical use.

3. Chemical Reduction Management and Continuous Improvement

Collaborate across the value chain to reduce the use of highly hazardous chemicals, implement green product concepts, and continuously review and improve the efficiency of chemical usage and management systems.
